

DBEaver

ON MAC

by SKILLCASE

How to install and setup Dbeaver on Mac?

- Head to <https://dbeaver.io/download> and the following webpage will open.

The screenshot shows the DBeaver Community website's download page. The header includes the DBeaver logo, the text 'DBeaver Community Free Universal Database Tool', a star count of 36,073, a 'Follow @dbeaver_news' button, and a search bar. A navigation menu contains links for Home, About, Download, Documentation, News, Support, DBeaver PRO, CloudBeaver, and DBeaver Merch. The main content area is titled 'Download' and is divided into two columns. The left column is for 'DBeaver Community 23.3.5', released on February 19th, 2024, and is free and open source. It provides download links for Windows (installer and zip) and Mac OS X (dmg). The right column is for 'DBeaver PRO 23.3', released on December 11th, 2023, and is a paid version with a trial available. It lists features such as advanced security, enterprise-level authentication methods, and support for various SQL and NoSQL databases. A 'Privacy & Cookies Policy' link is visible in the bottom right corner.

DBeaver Community 23.3.5

Released on February 19th 2024 (Milestones).
It is free and open source (license).
Also you can get it from the [GitHub mirror](#).

Windows

- [Windows \(installer\)](#)
- [Windows \(zip\)](#)
- [Chocolatey \(choco install dbeaver\)](#)
- [Install from Microsoft Store](#)
